

DRAFT FORECAST (Calculated as per Current Shallowest Points Apr 07 2022)

WEEK	DATE	SAN LORENZO	ROSARIO	SAN NICOLAS
14	4-Apr	9.51	9.60	10.01
15	11-Apr	9.93	10.10	9.97
16	18-Apr	10.06	10.11	9.97
17	25-Apr	10.15	10.19	10.02
18	2-May	9.94	10.03	9.95
19	9-May	9.76	9.86	9.85
20	16-May	9.76	9.85	9.83
21	23-May	9.81	9.90	9.86
22	30-May	9.83	9.93	9.88
23	6-Jun	9.81	9.92	9.87

The forecast is based on the current depth at the port and the latest long term water level forecast issued by INA (National Water Institute). INA draws information from multiple sources for its forecasts. Due to the present extreme low levels changes can be sudden and occur over short periods of time, such as rainfall, opening/closure of dams and weather induced tidal surges in the River Plate. The report is refreshed on a weekly basis and will always be subject to some level of deviation. The outlook is still critical and trends will be reported closely to better forecast short and medium term outlooks.

San Lorenzo's shallowest point now located at EP. BORGHI/BELLA VISTA 447,2 depth of 9,2 M at Zero datum
Rosario's shallowest point now located at Emp Alvear/Canal Muelles Ros 410.3 depth of 9.4M at Zero datum
San Nicolas' shallowest point now located at Arriba Obligado KM 311,6 depth of 9,9M at Zero datum
